The biological activity of bispecific trastuzumab/pertuzumab plant biosimilars may be drastically boosted by disulfiram increasing formaldehyde accumulation in cancer cells

Enhanced Synthesis of Foreign Nuclear Protein Stimulates Viral Reproduction via the Induction of γ -Thionin Expression

Approaches to Formaldehyde Measurement: From Liquid Biological Samples to Cells and Organisms

Fedor Lipskerov

Biotech Innovator | PhD | Protein Engineering
Haifa District, Israel

Summary

I'm a molecular biologist with over 10 years of experience in translational research and biotech innovation, working to turn complex science into real-world impact. Living with multiple sclerosis shaped my mission to make healthcare more precise, empathetic, and data-driven.

Experience

Synaptiflora

Senior Scientist

October 2023 - Present (2 years 5 months)
Israel

- Led scientific strategy and R&D execution for an early-stage biotech startup focused on the human microbiome and AI-driven drug discovery.
- Supervised cross-functional scientists to build metagenomic and machine learning pipelines for disease modeling and clinical data interpretation.

BioMed X Institute

Biotech Innovator

November 2025 - November 2025 (1 month)
Paris, Île-de-France, France

- Servier × BioMed X innovation bootcamp on next-gen AI platforms for bispecific antibody engineering.
- Developed a computational strategy for predicting dual-epitope engagement.
- Contributed to scientific modeling, concept development, and the final pitch presented to Servier R&D leadership.

BioMed X Institute

Postdoctoral Candidate / Scientific Innovator

May 2025 - May 2025 (1 month)
Heidelberg, Baden-Württemberg, Germany

BioMed X Boot Camp in collaboration with Daiichi Sankyo.

- Contributed to the scientific concept and strategy for novel peptide-based bispecific biologics targeting solid tumors
- Participated in the design of in silico, in vitro, and in vivo validation approaches
- Collaborated in an international, interdisciplinary team mentored by pharma R&D leaders

PastEcho

Co-Founder

February 2023 - October 2024 (1 year 9 months)

Netherlands

- Designed an AI platform translating speech and facial cues into emotional state maps to provide better care to dementia patients.
- Conducted field research in elderly care homes, directly collaborating with physicians, nurses, and caregivers to improve patient interaction and empathy loops.

BioMed X Institute

Postdoctoral Candidate / Scientific Innovator

April 2024 - April 2024 (1 month)

Heidelberg, Baden-Württemberg, Germany

Selected for the BioMed X Boot Camp in collaboration with Servier, focused on innovative diagnostics for autoimmune diseases.

- Co-developed an innovative diagnostic platform concept for autoimmune diseases
- Explored scientific feasibility, clinical need, and potential development pathways
- Collaborated in a multidisciplinary international team under mentorship from pharma experts at Servier
- Helped deliver the final pitch; team was awarded 1st place for scientific feasibility

AION Labs

Co-Founder Candidate

June 2023 - June 2023 (1 month)

Rehovot, Center District, Israel

Selected as a co-founder candidate for the AION Labs Boot Camp, focused on AI-driven targeted protein degradation.

- Contributed to the development of machine learning strategies to predict E3 ligase–Glue-POI target pairs
- Collaborated with a multidisciplinary team including computational biologists and pharma mentors
- Helped present the final pitch to pharma executives as part of the competitive innovation program

EFKO Group

1 year 10 months

Associate in the field of food/biotech startups

March 2021 - December 2022 (1 year 10 months)

Moscow

- Conducted comprehensive analyses of startups in the cultured meat production industry, focusing on cell culture technologies for muscle fibers and nutritional elements.
- Evaluated economic data to assess startup viability, growth potential, and strategic investment opportunities.
- Performed patent analysis, identifying key intellectual property trends and opportunities in the field.
- Reviewed and synthesized scientific publications to determine the innovation level and future prospects of emerging startups.
- Utilized database tools such as Web of Science, Derwent Innovation, Pitchbook, and Mintel for data gathering and analysis.
- Contributed to strategic decision-making and sales enhancement by providing insightful market and technology trends analysis.

Biotechnology Intern

March 2021 - July 2021 (5 months)

Moscow City, Russia

During my advanced training, I gained practical knowledge of how biotechnological production functions from the on-site laboratory and small bioreactors to full-scale production of the enzyme. Also, I gained expertise on how to modify yeast expression system for the cost effective production of the enzyme used in food industry.

A.N. Belozersky Institute of Physico-Chemical Biology, MSU Moscow Researcher

October 2015 - June 2022 (6 years 9 months)

Moscow City, Russia

During my work, I have contributed to the field of immunotherapy, particularly in addressing HER2+ breast cancer.

- Developed a bispecific monoclonal antibody against the HER2/neu oncoprotein.
- Led Design and Production of bispecific antibody in *N. benthamiana* plant using transient expression and viral vectors.
- Evaluated the efficacy of plant-produced antibodies, ensuring medical application standards.
- Investigated the impact of Nuclear Localization Signals (NLS) in enhancing protein synthesis, boosting expression vector productivity.

NeoVet

Doctor laboratory assistant

November 2018 - August 2019 (10 months)

Moscow, Moscow City, Russia

During my tenure at the veterinary clinic, I acquired comprehensive skills in veterinary clinical diagnostics. My expertise includes:

- Mastering animal blood and biomaterial sampling techniques.
- Performing complete blood counts and blood biochemistry analyses.
- Conducting detailed microscopy of urine and feces.
- Identifying various types of parasites.
- Utilizing ELISA for diagnostic purposes.

Education

Technion - Israel Institute of Technology

Doctor of Philosophy - PhD, Medicine

University of Kent

Molecular Biology and IVF

Lomonosov Moscow State University (MSU)

Master of Science - MS, Chemistry
